

Agua4All

Safe Water in Schools and Communities

The California Endowment launched Agua4All in 2014, a pilot project in partnership with nonprofit organizations Rural Community Assistance Corporation, Community Water Center and Pueblo Unido CDC. The team has installed 432 water bottle filling stations in South Kern County and Eastern Coachella Valley and 177 point-of-use arsenic filters in California schools and rural communities.

Agua4All:

- 💧 Raises awareness about California's drinking water crisis
- 💧 Builds community partnerships in schools and neighborhood by installing water bottle filling stations
- 💧 Identifies funding sources
- 💧 Develops long-term solutions for California's water quality and access problems

Need water bottle filling stations in your school or community?

Complete and submit the inquiry at:
